PROFESSIONAL SUMMARY

Aspiring creative talented Full Stack Web Developer having the complete skill sets that is required for one. I have a passion for coding. In the Front-end I have a great technical skill set that I would be able to create any application using React HTML CSS and Bootstrap. In the Back-end i can create REST API and hence i am able to clone the complete website. I am ready to begin my career so I am looking for an opportunity in a technology driven organization that would help me to enhance my career to showcase my technical skills.

PROJECTS

Quiz App |

Quiz App is an online website built from scratch on my own ideas, consisting of different categories to attempt quizzes any number of times and can go through the documentation.

This project is a solo project created during my 6th unit.

Features:

- JWT Authentication and Authorization
- Admin access and can add questions
- Different categories of quizzes
- Having documentation to go through
- Each user will get random 10 questions
- Once clicked on the option further you can't select any option
- After selecting option you can see explanation
- At the end of the quiz you can see your score
- Backend deployed to heroku and frontend to vercel

Tech Stack: React | CSS | JavaScript | Bootstrap | MongoDB | ExpressJs | Nodejs

Bobbi Brown |

Cloned online Bobbi Brown website which is a web application that caters to the all verticals of cosmetics

This project is collaborative, done by 6 team members and completed in 5 days.

Features:

- All category of cosmetics
- Authentication and Authorization.
- Build REST API along with the database Schema.

Tech Stack: React | CSS | JavaScript | Bootstrap | MongoDB |ExpressJs | Nodejs

Areas of Responsibility:

- Built complete responsive navbar
